

Remarks

Applicants thank the Examiner for the careful examination of this application and the clear explanation of the restriction.

The specification changes provide proper identification of the related patents and priority applications.

The new claims define subject matter different from the scope of the original claims. No election of original claims for further prosecution in this application is desired.

The new claims define a system depicted in Figure 17. Claim 41 includes the limitations of claim 1 of US 6,134,578. Depending claims 42-50 present the same limitations as depending claims 2-10 of that patent.

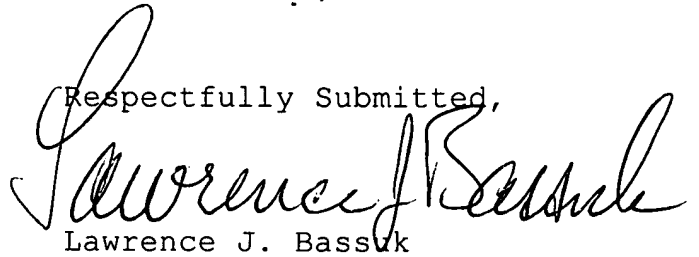

Applicants believe the present claims present a scope encompassing a cellular telephone described on page 63, line 13.

The new claims do not present an obvious-type double patenting situation over the claims in US 6,134,578. The new claims add limitations of a microphone, speaker and input and output leads that distinguish over the claims of that patent.

The art cited in that patent should be applied to the claims of this application.

The application is in allowable form and the claims distinguish over the cited references. Applicants respectfully request reconsideration or further examination of this application.

Respectfully Submitted,

A handwritten signature in cursive script, reading "Lawrence J. Bassuk". The signature is written in dark ink and is positioned above the typed name and title.

Lawrence J. Bassuk
